

Celyad is looking for a **R&D Technician**. The successful candidate will be based in Belgium (Mont-Saint-Guibert). The R&D Technician reports to the R&D Lab Manager. He/she participates in the planning, execution and analysis of specific scientific experiments related to the translation of basic research into clinical development. The R&D Technician provides support to the R&D Department and works closely with the R&D Scientists to fulfil the R&D objectives.

Role & Responsibilities

- Perform experiments timely and with high accuracy according to Celyad Oncology quality standards.
- To be involved in the production and optimization of CAR-T cells.
- To be involved in the development/validation of methods aimed at characterizing therapeutics that form the core focus of the R&D Department.
- To contribute to the laboratory maintenance activities, including logistics, managing of stocks and inventories and maintenance of equipment.
- To ensure traceability of data and operations
- Support R&D scientists with preparation of protocols, planning and analysis of experiments.
- Keep up with scientific background on personal project(s) through pro-active communication with scientists and participation in scientific meetings.
- Maintain high standards in lab ethics.
- To take part in weekend rotation (max 1 WE/ 2 months)

Qualifications & Experience

- Bachelor or master's degree in Biological sciences.
- Relevant experience in research within Biotech/Pharma industry is a plus.
- Relevant experience in standard cellular and molecular biology techniques such as DNA cloning, gene expression analysis, gene transfer (e.g. retrovirus, lentivirus), (primary) cell culture, multi-color flow cytometry and ELISA is a plus.
- Good knowledge of common computer software packages (Windows, MS Office, etc.)
- Good knowledge of English and French.

Skills & Competencies

- Deliver results and commit to achieve challenging objectives
- Self-motivated and enthusiastic personality
- Good planning & organizational skills
- Team player
- Flexibility and can-do attitude
- Problem solving, proactive
- Quality Mindset
- Integrity & Trust

About Celyad Oncology

Celyad Oncology is a clinical-stage biotechnology company focused on the discovery and development of chimeric antigen receptor T cell (CAR T) therapies for cancer. The Company is developing a pipeline of allogeneic (off-the-shelf) and autologous (personalized) CAR T cell therapy candidates for the treatment of both hematological malignancies and solid tumors. Celyad Oncology was founded in 2007 and is based in Mont-Saint-Guibert, Belgium and New York, NY. The Company has received funding from the Walloon Region (Belgium) to support the advancement of its CAR T cell therapy programs. For more information, please visit www.celyad.com.
