

Celyad is looking for a **Research & Development Associate Scientist (M/F)**. The successful candidate will be based in Belgium and will report into the Research & Development (Senior) Manager in Mont-Saint-Guibert.

Role:

He/She will be responsible for the accurate design, planning, execution and reporting of specific scientific studies geared towards the optimization of new allogeneic CAR-T cell products.

Responsibilities:

- Design, plan, perform and oversee research studies in accordance with the R&D objectives
- Present scientific data within the R&D department
- Ensure accurate internal data reporting including scientific report drafting and reviewing
- Participate in and be fully cognizant of practical laboratory work
- Be proactive at reporting and resolving technical hurdles associated with his/her studies
- Stay up-to-date with the latest scientific progress and technologies within his/her projects
- Ensure compliance of his/her research studies with internal guidelines in regard to data traceability, laboratory ethics and SOPs
- Be aware of regulatory recommendations related to his/her work

Qualifications & Experience:

- Master in biological sciences with emphasis on immunology, cellular or molecular biology
- At least 2 years of relevant experience in research within a Biotech/Pharma company. Experience in immunology and or cell therapy is a plus.
- Molecular biology experience including cloning, gene expression (e.g. qPCR, immunoblotting), gene transfer (e.g. retrovirus, lentivirus) and gene editing
- Expertise in primary cell culture and flow cytometry
- Fluency in English, orally and in writing; good knowledge of French would be an advantage

Skills & Competencies:

- Self-motivated and enthusiastic personality
- Strong ability to work in team focused upon delivery of results that support the Company's objectives
- Result-driven and committed to achieve challenging objectives
- Scientific writing and presentation skills
- Problem solving, proactive
- Excellent planning & organizational skills
- Flexibility and can-do attitude
- Quality mindset
- Integrity & Trust
- Excellent communicator

About Celyad Oncology

Celyad Oncology is a clinical-stage biotechnology company focused on the discovery and development of chimeric antigen receptor T cell (CAR T) therapies for cancer. The Company is developing a pipeline of allogeneic (off-the-shelf) and autologous (personalized) CAR T cell therapy candidates for the treatment of both hematological malignancies and solid tumors. Celyad Oncology was founded in 2007 and is based in Mont-Saint-Guibert, Belgium and New York, NY. The Company has received funding from the Walloon Region (Belgium) to support the advancement of its CAR T cell therapy programs. For more information, please visit www.celyad.com.
