

Celyad Oncology is looking for a **Supply Chain Specialist**. The successful candidate will be based in Mont-Saint-Guibert and will report into the **Procurement & Supply Chain Manager**.

Role:

The Supply Chain Specialist is member of the Procurement & Supply Chain team, as part of the Cell Therapy Manufacturing Unit (CTMU). He/she plays a central role by orchestrating all strategic and operational supply chain activities of the company. The Supply Chain Specialist works closely and collaboratively with other departments across the company (e.g. R&D, Clinical operations, Quality Assurance) to support the clinical development and global supply of cell therapies for cancer. Within this frame, the Supply Chain Specialist is also expected to ensure the compliance of supply chain activities with GxP requirements and other applicable legislation.

Responsibilities

- Coordinate all logistics activities of the company (e.g. warehouse management, shipping management, inventory management).
- Coordinate the planning of critical supply chain activities (e.g. clinical supply).
- Manage supply chain service providers.
- Manage all quality aspects related to supply chain activities in line with GMP/GDP requirements (e.g. change control, risk assessment, URS, deviation, CAPA).
- Manage supply chain SOPs and associated documents.
- Lead supply chain projects.
- Lead resolution of issues and continuous improvement initiatives for the supply chain operations and areas.
- Manage ERP system.
- Define and monitor supply chain KPI's.
- Remain current on industry and regulatory trends.
- Provide training sessions to logistics technicians and colleagues from other departments.
- Be the back-up of the Procurement & Supply Chain Manager for the supply chain activities.
- Support Logistics Technicians if/when needed (e.g. peak of activities).

Qualifications & Experience

- Bachelor or master's degree in supply chain management or other relevant discipline; or working experience in supply chain including Logistics activities.
- Minimum of 3 years' experience within a Biotech/Biopharmaceutical company.
- Minimum of 3 years' experience in supply chain.
- Good understanding and application of GMP/GDP and regulatory requirements.
- Experience in project management.
- Experience in cell therapy industry would be an asset.

Skills & Competencies

- Can do attitude and Hands-on approach.
- Excellent interaction & communication skills, required to work across departments. Good analytical and problem-solving mindset. Creative and innovative.
- Focused on quality, compliance and detail.
- Flexible mindset capable to deal with ambiguity and to respond quickly, energetically, and enthusiastically to changes.
- Self-motivated, enthusiastic personality, team player, with a desire to learn new skills and train juniors.
- Tenacity to drive issues until resolved and deliver results.
- Languages: French & English, written & oral (B2 – Independent User).
- Proficient user of Microsoft Office applications.

About Celyad Oncology

Celyad Oncology is a clinical-stage biotechnology company focused on the discovery and development of chimeric antigen receptor T cell (CAR T) therapies for cancer. The Company is developing a pipeline of allogeneic (off-the-shelf) and autologous (personalized) CAR T cell therapy candidates for the treatment of both hematological malignancies and solid tumors. Celyad Oncology was founded in 2007 and is based in Mont-Saint-Guibert, Belgium and New York, NY. The Company has received funding from the Walloon Region (Belgium) to support the advancement of its CAR T cell therapy programs. For more information, please visit www.celyad.com.
